DANIELLE STANTON

My name's Danielle. *The Danielle* if you're feeling saucy. Hi. I tutor math, physics and chemistry. I don't have any degrees, but that's a good thing for you. It means I can't charge you nearly as much as I'm worth. You can get me on the cheap, yo. I give the best high fives ever and my mom thinks I'm awesome. You will too. Hit me up.

SEE...? I ROCK.

HOW TO FIND ME

On teh interwebz.

www.DanielleStanton.com

On teh email.

madpampees@yahoo.com

On teh horn.

626.488.2611

And wandering around Oakland. Hope to hear from you.

MATH & SCIENCE ARE FUN... NO, REALLY!

Stop laughing. I'm totally serious. Okay, okay, maybe learning math, physics and chemistry isn't as much fun as, say, naked skateboarding off of the back of a golf cart, but it doesn't have to be boring. And it certainly shouldn't make you cry. Yeah, the material can be really really hard to learn, and it can be super frustrating to try to figure out on your own, and your classmates might be helpful, but they're still learning too. And professors... well, we all know about professors. That's where I come in, your kick ass tutor.

I CAN'T TAKE THE TEST FOR YOU

The best way to learn math is by solving problems. So this is how it works. You bring the problems you're having a hard time with, then I do one as an example, slowly, explaining the reasons for each step, and you stop me if you're confused or unclear, and we get every step of the problem straight in your head. Then you do a problem and I help you, mostly by asking you questions if you get stuck or take a wrong turn. Then you do another problem. Then another one. Then another one. Why? Because I can't take the test for you. I'm like training wheels when you're learning to ride a bike.

SUBJECTS

I can tutor you in any of these subjects, it doesn't matter if you're in first grade, going back to school after you've retired, or anywhere in between.

- Basic Math
- Pre-Algebra
- Algebra I/II
- Geometry
- Trigonometry
- Pre-Calculus
- Calculus I/II/III
- Elementary Diffy-Q
- Physics
- Chemistry

PRICING

I charge by the hour, \$30-40, depending on the subject and where you want to meet. I find it best to meet with students for 60 to 90 minutes per session, at least twice a week. I put that 90 minute time limit on because 90 minutes is just about the limit of how long the brain can stand to do math problems without a substantial rest. Twice a week because you have to practice!
